Classification Report:

	precision	recall	f1-score	support
0	0.94	0.92	0.93	79
1	0.86	0.88	0.87	41
accuracy			0.91	120
macro avg	0.90	0.90	0.90	120
weighted avg	0.91	0.91	0.91	120

1.What is the percentage of total performance of support vector classification?

- Support vector classification(svc)→accuracy = 0.91.

2.What is the percentage correct classification of Non purchased in SVC?

- The percentage of correct classification (Recall) of non_purchased in SVC is 0.92.

3.What is the percentage of correctly and wrongly classified of Purchased in SVC?

- The percentage of correctly and wrongly classified of Purchased (Precision) in SVC is 0.86.

4.What is the overall performance of the purchased class?

- The Overall performance(F1 measure) of the purchased class is 0.87.

5.what is the proportion value of the precision?

- The proportion value(weighted average) of the precision is 0.91.
